**Dow Systems and RS Technik Group Sign Global Alliance
for Sewer Pipe Rehabilitation**

*Agreement will create a competitive and innovative leader
in epoxy-based solutions for the trenchless industry*

SINGAPORE – June 24, 2009 – Dow Systems, a global business unit of The Dow Chemical Company (Dow), and RS Technik Group (including RS Technik, RS Lining Systems and Maxliner) announced today that they will form a global commercial alliance focusing on the sewer pipeline rehabilitation market, specifically on the trenchless technology called cured-in-place pipe (CIPP). This alliance will combine Dow’s high-technology performance resin systems, characterized by high chemical resistance and mechanical properties, with the state-of-the-art CIPP technology developed and owned by RS Technik Group. It will further increase the partners’ competitive advantages and differentiate the many benefits they offer versus other CIPP providers. The announcement was made during the International Water Week held in Singapore.

“Dow Epoxy Systems has a strategic focus on the protection of high value infrastructures, or those infrastructures whose failure carry major economic and environmental impact. Sewer pipeline rehabilitation fits squarely within this focus, and it is a key area for business development and growth,” said Pepe Carnevale, global general manager, Dow Epoxy Systems. “Dow’s global alliance with RS Technik Group represents a significant step forward for Dow in becoming the worldwide leader in epoxy-based solutions for the trenchless industry.”

“This alliance with Dow will further enhance RS Technik Group ability to be a global leader in trenchless technology solutions, accelerating our growth and the development of the CIPP technology against other less competitive solutions and the traditional dig-and-replace options,” explained Klaus Mueller, President of the Board, RS Technik AG. “The expanding pipeline rehabilitation sector will benefit from the progressive leveraging of Dow Systems solutions, a significant factor in this alliance.”

News Release

“This alliance will significantly enhance the value to our customers by combining Dow’s technology, innovative formulations and industrial strength, high performance products and global reach with RS Technik Group’s state-of-the-art technology, experience and proven business model,” said Juan Antonio Merino, Dow Systems global general manager. “It is a perfect demonstration of the strategic intent of the newly formed Dow Systems global business unit that combines our Polyurethane Systems and Epoxy Systems businesses. We aim at maximizing our capability to serve our customers and the market, accelerating the value creation through a joint approach that leverages customer intimacy, operational excellence and fast, customized solutions to solve customer process and product-oriented problems.”

About Dow Systems

Dow Systems, a global business unit of The Dow Chemical Company (Dow) is a global industry leader in the development and formulation of fully formulated polyurethane and epoxy systems, focused on providing its customers worldwide with innovative tailor-made solutions for energy conservation, wind energy, high value infrastructure protection and consumer products.

About RS Technik Group

Headquartered in Europe, RS Technik Group is market leader in epoxy-based “cured-in-place pipe” (CIPP) solutions and systems for the trenchless industry. RS Technik Group comprises RS Technik, RS Lining Systems (exclusive distributor in North, South and Central America of the RS CityLiner®) and MaxLiner USA. For more than fifteen years, RS Technik Group has been the primary provider of comprehensive rehabilitation systems such as the RS MaxLiner® (solutions for relining house connections and laterals), RS CityLiner®, RS RoboLiner®, RS CombiLiner® (pipeline rehabilitation for main sewers) and others which include special equipment, liners for impregnation, epoxy formulations, on-site training and technical follow-on support to customers. These systems, invented in Europe, are already proven in Europe, the United States and Mexico. More information: www.rstechnik.com.

About Dow

With sales of \$58 billion in 2008 and 46,000 employees worldwide, Dow is a diversified chemical company that combines the power of science and technology with the "Human Element" to constantly improve what is essential to human progress. The Company delivers a broad range of products and services to customers in around 160 countries, connecting chemistry and innovation with the principles of sustainability to help provide everything from fresh water, food and pharmaceuticals to paints, packaging and personal care products. On April 1, 2009, Dow acquired Rohm and Haas Company, a global specialty materials company with sales of \$10 billion in 2008 and 15,000 employees worldwide. References to “Dow” or the “Company” mean The Dow Chemical Company and its consolidated subsidiaries unless otherwise expressly noted.
