

**Meet John Schroeder, P.E. !**  
**Principal / Trenchless Discipline Leader**  
**CDM**  
**Columbus, Ohio**  
**Schroederjp@cdm.com**  
**614 847-8340**

1. *Tell us a little about you – how did you end up in this industry?  
I have been involved in Trenchless Technologies since 2000 primarily in the planning, design and construction of pipeline rehabilitation projects.*
2. *Tell us about your company. CDM is one of the largest environmental consulting firms in the country with over 3500 employees worldwide. We have also consistently been in the top 10 Trenchless design firms*
3. *Why did you join NASSCO? I have met many of the active members over the past 8 years. After getting my training in PACP and have trained people across the country I decided it would be good to become more involved with the organization and be able to contribute to future improvements of the PACP& MACP program.*
4. *What are the top challenges facing our industry? Lack of Federal Funding*
5. *How should NASSCO help address this issue? Make more contacts with federal politicians and lobby for more federal funding.*
6. *How has being a NASSCO member helped your career or business? PACP Training internally, for contractors and clients across the country.*
7. *What else should other NASSCO members know about you? Perfection is not attainable, but if we chase perfection we can catch excellence.*
