

## CONTRACT RESPONSIBILITIES

Sewer collection system rehabilitation contracts should define or affix responsibility for or make provisions for the following items:

- 1 NOTICE OF CLIENT/OWNER REQUIREMENTS which are relevant to and within the scope of work to be performed under the contract.
- 2 MUNICIPAL AND OTHER LICENSES AND PERMITS--and assistance in obtaining approvals or consent from utilities or carriers such as the telephone company or other persons or organizations upon whose property or authority performance of work under the contract might impinge--or a written release from responsibility for the performance of work under the contract if and to the extent such work is precluded by the inability to obtain approvals or consent.
- 3 ACCESS TO SITE OF WORK to be provided to the extent that the Owner is legally able to so provide or, if not so able, a written release from responsibility for the performance of work at sites where access cannot be made available.
- 4 CLEARANCE OF BLOCKAGES OR OBSTRUCTIONS in the sewer system, if any, if such clearance is required for performance of work under the contract and if such clearance is not otherwise provided for within the contract.
- 5 LOCATION AND EXPOSURE OF ALL MANHOLES, unless otherwise provided for in the Technical Specifications of the contract. It shall be the responsibility of the owner to locate and designate all manhole access points open and accessible for the work, and provide rights of access to these points.
- 6 A MANHOLE-NUMBERING SYSTEM for all areas of the project and accurate manhole invert elevations when required for performance of the work.
- 7 THE SHUTDOWN OR MANUAL OPERATION OF CERTAIN PUMP STATIONS if such becomes necessary for performance of the work.
- 8 WATER necessary for performance of work under the contract from fire hydrants at the site of work or other suitable designated sources.
- 9 DISPOSAL AREA for all materials removed from the sewers during the performance of the work and the unencumbered right of the Contractor to transport and expeditiously dispose of such materials. The Owner shall also provide a dump site for all debris removed from the sewers during the cleaning operation. Unless stated otherwise, it is assumed this site will be at or near the sewage treatment facility to which the debris would have arrived in absence of the cleaning operation. Any hazardous waste material encountered during this project will be considered as a changed condition.
- 10 A SECURE STORAGE AREA of a size adequate to accommodate the required vehicles, equipment and materials for the period of performance of the contract.

- 11 NOTICE TO THIRD PARTIES (such as public utilities and the telephone company) of the Contractor's intent to perform work in an area where such parties may have rights to underground property or facilities, and request for maps or other descriptive information as to the nature and location of such underground facilities or property and assurance of the Contractor's ability to enter upon any public or private lands to which access is required for performance of the work under the contract.
- 12 INFORMATION PERTINENT TO THE SITE of the project including reports prepared under previously accomplished studies or surveys and other data relative to the project, including maps, drawings, construction specifications, sewer system records, etc.
- 13 AUTHORIZATION to perform work which must be performed during nighttime hours, on weekends, or on holidays.
- 14 TRAFFIC CONTROL by uniformed officers when the safety of workers or the public requires such protection, or as may be specified.
