---

Issue # 108

Date 7/19/11

Version PACP V2.2, V4.2, V4.4, V6.0

## ***Issue***

If TFD is used, is it required that a second condition be entered at the same footage?

## ***Conclusion***

If the mainline is cracked, fractured, or there is infiltration entering, a separate defect should be coded and entered. For some defective conditions a remark field is more appropriate.
