

PACP User Recertification on the Horizon

April 7, 2011

NASSCO is currently developing a PACP User recertification program which we anticipate to be released in June 2011. Like many other certification programs, PACP users will need to recertify every three years to keep their certification active. Recertification can be completed on-line or through a Master Trainer. We anticipate the cost for recertification will be approximately \$175 for members and \$225 for non-members.

Those with a manual older than version 4.43 (released in June 2010) will be required to purchase a new manual for \$150 plus shipping, due to major changes to the document. Those with version 4.43 and newer may download updates made available for free (if needed) by logging into the Manual Updates section of www.nassco.org.

PACP Users will receive a 6 month notification of expiration by email. Please contact NASSCO, by email at members@nassco.org, as soon as possible with a current email address.
